RCBO is designed for use in domestic, commercial and industrial distribution systems at the most downstream circuit for ensuring protection from leakage current, short circuit & over load to the user for a particular circuit. In normal use, it is safe to use and free of threat to user as well as to environment.

## RCBO - A Type (SPN - 2 M)

## Home Safe PRCD Plug

PRCD Plug is a modern human protection device. It provides socket level protection to human from electric shock by shutting off the appliance in case of detection of current leakage. User friendly plug easily fits with various appliances and ensures protection from electric shock.

HSN Code - 8536

| Description                  | DP Cat. No.      | List Price in ₹<br>Per Unit |
|------------------------------|------------------|-----------------------------|
| 16 A 30 mA Euro II PRCD Plug | DHPLJWH016201603 | ₹ 767.00                    |

## Home Safe PRCD Adaptor

PRCD Adaptor is a modern human protection device. It provides socket level protection to human from electric shock by shutting off the appliance in case of detection of current leakage. It can be easily plugged to various appliances.

HSN Code - 8536

| Description                     | DP Cat. No.      | List Price in ₹<br>Per Unit |

## Home Safe SRCD

Havells HomeSafe is ready to use all-in-one device that provides protection to humans from electric shock due to direct or indirect contact as well as provide protection from overload and short circuit.

It is a one stop solution to protect appliances as well as humans operating it and it is designed for quick & easy installation.

HSN Code - 8536

| Description                | Rating | DP Cat. No.     | List Price in ₹<br>Per Unit |

## SRCD DBOXx

Havells DBOXx SRCD is ready plug & play all-in-one device that provides protection to humans from electric shock due to direct or indirect contact as well as provides protection from overload and short circuit faults.

It is designed such that user can easily upgrade his installation by replacing existing socket boxes and get built-in protection.

Industrial plug and socket are used to provide power in industrial environments and areas exposed to corrosive chemicals, extremes of weather and rough use with high demands on safety, reliability and durability. Havells provides a comprehensive range of plug and socket to suit all environments & applications, manufactured to the highest quality and having robust ergonomic design.

Havells industrial plug & socket range adopts 'preventing incorrect insertion' design and its high grade thermoplastic material ensures good electric insulation, high impact resistance, dustproof, damp proof and watertight connections. Nickel plated contacts provide better corrosion resistance in aggressive environments and at high degrees of air humidity.

HAVELLS provides IP 44 range of plug & socket, protected against splashing and spraying of water, and IP 67 weatherproof plug and socket range that can withstand temporary immersion in water. Some typical applications are highlighted below.

## Application

|                                                                                |                                                                                                                                   |                                                                                                                                                                                                             |
|--------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Agriculture                                                                    | Mobile or portable equipment or appliances used or stored on sheltered premises.                                                  | Outdoor installation of pumping, ventilation, drying equipment.                                                                                                                                             |
| Chemical industry                                                              | Indoors on premises for storage and maintenance purposes where connections are not exposed to the risk of immersion or chemicals. | On premises without risk of explosions but where the connections are exposed to chemicals and subject to possible immersion.                                                                                |
| Construction sites and shipyards                                               | On covered construction sites sheltered against weathering but exposed to splashing with water.                                   | On outdoor construction sites where the connections are left on damp ground exposed to freezing, dust and weathering.                                                                                       |
| Sports complexes and other places of public entertainment, TV and film studios | On sheltered premises protected against the weather, though exposed to splashing, without high connected loads.                   | Outdoor connections exposed to rain, snow, mud, freezing and other critical weather conditions. Where mated safety is required. Where high voltage for lighting installations, T.V. and audio are foreseen. |
| Food industry                                                                  | In sheltered locations, on indoor premises used for storage and maintenance.                                                      | In locations subject to washing by hosing down and where connections are subject to heavy duty.                                                                                                             |
| Heavy industry                                                                 | In sheltered warehouses, maintenance workshops, assembly and moulding areas.                                                      | In rolling mills, foundries, blast furnaces, etc., where the connections are exposed to dust, metallic shavings, coolants and are subject to vibrations and impact.                                         |
| Light industry                                                                 | Locations without high humidity or ambient pollution serving for assembly, moulding, maintenance and storage                      | On premises subject to cleaning by means of chemical solvents. Also where heavy loads require high safety in connections.                                                                                   |
| Installations for IT centres                                                   | For electrical connections executed above floor level.                                                                            | For electrical connections under raised floors with risk of immersion. Where heavy loads require high safety in connections.                                                                                |
| Ports                                                                          | In sheltered locations such as docks, repair shops, offices, etc.                                                                 | Quays, docks, piers, etc. where there is risk of high waves and partial flooding.                                                                                                                           |
| Airports                                                                       | In sheltered locations, hangars, repair shops, warehouses.                                                                        | Outdoors for connection between mobile or portable appliances and aircraft.                                                                                                                                 |
| Water treatment plants                                                         | Indoor use in repair shops, etc.                                                                                                  | In all locations with risk of flooding and for outdoor use with pumps, aeration and ventilation systems.                                                                                                    |

Note: MCB to be bought separately.

Time switches are used in residential, commercial and industrial premises to improve comfort and save energy by switching loads automatically as per real time. Havells offers a variety of time switches to precisely meet the requirements of different applications. The range offers several feature benefits such as different options of minimum switching time, internal battery to enable the timing function in case of power failure, daily and weekly versions, simple and compact design.

#### Features

- Digital and analog version
- Easy time setting
- Helps in saving energy & time
- Text oriented user guidance in display
- Modular, compact & din-rail mountable design

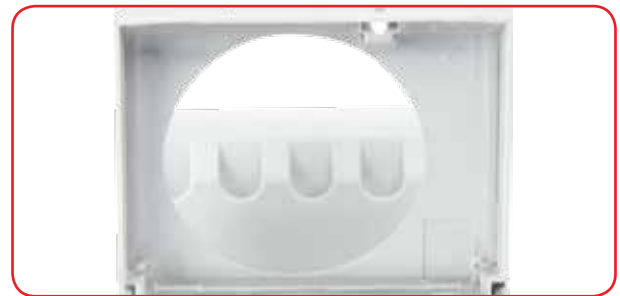

#### Range

- Multifunction Time Switch
- Digital Weekly Time Switch
- Astronomical + Digital Time Switch
- 24 Hours Analog Time switch
- Twilight Time Switch
- Staircase Time Switch

#### Large LCD Display

Easy snap on din-rail mounting

#### Protective Cover

For protecting the LCD from mechanical shocks & scratches

#### Manual Override Option

All time switches have the option to manually override the programming and permanently ON/OFF the circuit for emergent situations (without disturbing the pre-set program).

## Time Switch

Time switches are used in residential, commercial and industrial premises to improve comfort and save energy by switching loads automatically as per real time. Havells offers a variety of time switches to precisely meet the requirements of different applications. The range offers several feature benefits such as different options of minimum switching time, internal battery to enable the timing function in case of power failure, daily and weekly versions, simple and compact design.
